

HEALTHCARE SECURITY

Access Control

Access control solutions keep employees and inventory safer by limiting and monitoring authorized access to rooms and areas. Allow employee access to specific areas by setting varying levels of security clearance depending on individual employees' needs and authorization.

Video Surveillance

Ensure safety in the facility while protecting your assets, patients, staff, and visitors with a commercial video surveillance system. Day or night, the use of surveillance cameras are a proven deterrent and help you capture and track activity.

Intrusion Detection

Intrusion alarm is a standalone or integrated component of commercial security systems. Intrusion components include control panels, keypads, sensors, alarm and sounding devices.

Alarm Monitoring

Remote security and alarm system monitoring services for your hospital or clinic. As an add-on to your commercial security system, services may include automated alerts of intrusion, alarm, and more.

HEALTHCARE SOLUTIONS

Whether you are a hospital, clinic, long-term care facility, or any other healthcare organization, LINSTAR Security is your trusted partner for cutting-edge technology solutions. With our extensive expertise and commitment to excellence, we are dedicated to helping you enhance patient care, improve security, and optimize operational efficiency.

Healthcare ID Badges & Cards

A high level of security is important for healthcare ID badges, as it critical to properly identify staff and employees in a hospital or clinic setting. In addition to visual identification, ID badges can be used for additional functions — such as access control, tracking and transactions — using barcode or embedded smart card technology.

Badge Buddies is a popular ID badge accessory add-on that helps visually identify staff and employee positions in a fast pace and high traffic environment. LINSTAR Security has experience providing ID card system sales and service to healthcare organizations, complete with ID card printers, ID software, and custom badge accessories.

HIPAA/HITECH Data Security Compliance

HIPAA mandates that all healthcare organizations comply with strict rules designed to protect the confidentiality and integrity of patient information. Multi-factor authentication ensures only authorized access to secure and critical patient data.

Weapon Detection System

Weapon Detection Systems offer an advanced solution that combines cutting-edge technology with a streamlined user experience to help optimize security protocols in healthcare facilities. With advanced artificial intelligence and machine learning capabilities, these systems enable a fast and accurate screening process, helping reduce wait times while improving overall operational efficiency.

Patient ID Wristbands and Labels

Correctly identifying patients throughout their entire healthcare experience—from admission to treatment to discharge—is crucial. Patient identification errors can be costly, so it is important to improve the accuracy of patient identification with reliable wristbands and labels.
